

RAYMOND RECORDER

VOL. 46—No. 44

THURSDAY, JULY 21, 1949.

THE VITAL QUALITY

The growing pattern of violence in labor disputes is becoming too obvious to be ignored. There was violence in the recent textile strike in Paris, Ontario, violence in many parts of the world in the past and present struggle between warring seamen unions. There has been serious violence at Asbestos, Quebec, and violence at the strike-bound Heywood-Wakefield plant at Orillia, Ontario. Violence is not an argument it must not be permitted to succeed. For a law that is openly defied or carelessly maintained discredits all law. True, the great bulk or organized workers are on of sympathy with such tactics. They recognize that there are sound laws for their protection, and a weight of public opinion on their side. Yet a few hot heads continue to force violence on a majority. We want to know why? The answer is tragically simple. Nobody—neither labor's cooler heads nor the public at large nor responsible officialdom is sufficiently concerned. Labor says "Well, they may get something for me." The public says: "It isn't my business." Officialdom says: "Look at the votes involved." So we sell out our birthright of law and order.

At Asbestos there has been trouble serious trouble. The Catholic church has disapproved the precipitous strike action of a Catholic union. The Quebec government had declared the strike illegal and has sent police to maintain order. The police were man-handled, public safety was jeopardized, the Riot Act was read and numbers were arrested. And the public it took up collections for the rioters. It challenged the action of the government. "It will be the end of Duplessis", say responsible union officials who are not directly involved. Again we ask why? Because we, the people, cannot make up our minds where our loyalties lie. Why not make it up this way? Not for management, Not for labor, but for the law that is very much our business and that our carelessness is discrediting.

In Kipling's "Soldiers Three", appears the story of the "Big Drunk Draft". It might be read for the good of the soul. It tells of the "little officer boy" in charge of a draft of three-expired men—seventy five

NEWS NOTES

Tuesday evenings the Fourth Ward sponsors fun nights. Volley ball and two games of Croquet were in session with Mrs. Vi Meeks directing the Volleyball and Mrs. Beth Galbraith the Croquet games. Anyone is invited to come. On Thursday the First ward Mutual has games and all are welcome.

Elder Archie Bennett of Salt Lake has been a visitor this week at the Marshall Milner home. Mr. Bennett is an old timer in this district and is well acquainted here.

Max Heggie is a patient in a Calgary hospital where he underwent an operation on his knee. Mrs. Heggie was in Calgary with him on Monday.

Also a patient in a Calgary hospital is Roy Hall who recently had the misfortune to break his leg in a power take off on his tractor.

Mr. and Mrs. Karl Wilde returned Monday from a trip to Eastern Canada. While there they picked up a new Dodge car and returned by way of the United States.

Mr. and Mrs. Cliff Gough and Mr. and Mrs. Rudolph Tollestrup recently enjoyed a motor trip to Banff.

Dr. and Mrs. Harris Walker are business visitors in Edmonton this week.

Drunk, rebellious scoundrels, spoiling for trouble and all too conscious of their rights. It was the "officer boys" decision that it was his business to do his job, forgetting of personal danger or present popularity, and even at some straining of the conventions. So he whipped that gang of rioters into the semblance of an orderly company. Doing so he maintained his own integrity and gained their respect and admiration. "It was guts", said Mulvaney. Guts it was. The quality that all men understand and respect. Isn't it time we stopped apologizing for maintaining the law? Laws we must have. Respect for law we must have. The unassailable security of law we must have. But it takes guts to maintain them.

Local Happenings

Mr. and Mrs. Art Atwood have had as their guests Mr. and Mrs. Gruver Nelson (nee Laura Atwood) of Vancouver. While here the two families motored to Waterton where they spent an enjoyable week-end.

Mr. and Mrs. Louis King of Seattle have been visiting in Raymond the past two weeks with Mr. and Mrs. L. D. King and relatives here and in Magrath.

Bruce Linkos was a visitor in Raymond the past week from Seattle. He returned by plane Wednesday morning.

Mr. and Mrs. H. F. Allen announce the engagement of their youngest daughter Katherine, to Joseph Keeler son of Mr. and Mrs. David Keeler, of Magrath. The marriage will take place this month.

Mr. and Mrs. Delbert Thompson spent a recent holiday vacation at Banff.

Mr. and Mrs. Bill Zobell, Mr. and Mrs. A. Zobell, Mr. and Mrs. Bob Zobell and Mr. and Mrs. John Zobell and families have been vacationing in Banff for the past week.

Dr. and Mrs. Maurice Heninger have been guests at the W. A. Heninger home. They recently visited Utah, accompanied by Miss Louene Heninger. On their return to Raymond they were accompanied by Mr. Joseph S. Brammer.

Dr. and Mrs. Orson Bingham, accompanied by Miss Jean Bingham of Magrath and Mr. and Mrs. Roy Peterson of Welling, recently returned from an extensive trip to Provo, Salt Lake, California, Mexico and returned home by way of Tacoma Washington where they visited with Mrs. Bingham's sister Mrs. Fred Smith and family.

Mr. and Mrs. Heber Allen have as their guest Mr. Allen's sister Mrs. Hazel Albin Snow and husband and family of Salt Lake City.

Dr. and Mrs. Harlan Taylor recently arrived in Raymond from Texas to make their home. Dr. Taylor will assist Mrs. Walker and Brewerton in their practice here.

John Smith and Douglas Litchfield have gone to Taher to work in the Cannula factory for the season.

Mrs. Fanny Litchfield has recently returned from Banff where she visited her sister.

Mrs. Beth Galbraith has as her guests her sisters and brothers-in-law Mr. and Mrs. Lee Burr (Melba Heninger) and family of Los Angeles, and Mr. and Mrs. Arlo Palmer (Zina Heninger) of Rosemary. Also Mrs. L. Heninger of Lucky Strike, Alta.

The girls of the staff of Alberta Government Telephones and the sisters of Miss Pearl Hancock sponsored a shower in her honor recently in the club rooms of the Opera House. Many lovely gifts were received and many ladies called during the evening.

A calling shower was held at the home of Mrs. Heber F. Allen when a number of friends honored Miss Katherine Allen, whose marriage takes place this month.

Guests were received by Misses Irene and Mary Snow, cousins from Salt Lake, also Shirley Allen, Barbara Wing and Lella Wing, Marjory and Carolyn Taylor.

A guest book was signed and the lovely gifts were arranged and displayed by Mrs. Margaret Bridge. Miss Irene Snow seated the guests at the tables where a lovely lunch was served.

Out of town guests were Mrs. Afton Keeler and daughter, Mrs. Ray Barker, Mrs. Ed Jensen, Mrs. V. Coleman, Miss Pauline Bridge, Mrs. Betty Tanner, Mrs. Geraldine Anderson, all of Magrath.

A quilting party was held Monday afternoon at the home of Mrs. Mabel Heninger. A beautiful satin quilt was finished. A dainty lunch was later served.

Genealogical Convention Well Attended

The Genealogical Convention was held Sunday in the Taylor Stake House with Elder Archie Bennett of the Salt Lake Genealogical Society as the representative of the church here. Good crowds enjoyed his sermon in all three sessions and heard him tell of his experiences in foreign countries gathering and micro-filming old records of those countries. He explained the work of the Genealogical Society of the church and how far they have gone and the magnitude of the work yet to be done. The work of the gathering records can never cease.

Besides the Taylor Stake, the Alberta Stake and the Lethbridge Stake were well represented with good attendance.

John Steele of Magrath had charge of the morning session and afternoon session. The morning session at 10 a.m. featured Brother Bennett as the main speaker and the audience also had the privilege of hearing from the Presidents of the three stakes, President Gordon Brewerton of the Alberta Stake, President Urnsback of the Lethbridge Stake and President Walker of the Taylor stake.

Also speaking briefly were Brother Miller, Chairman of the Lethbridge Stake Genealogical committee, and Brother Quinton, Chairman of the Alberta Stake Genealogical committee. Musical numbers included a quartet by Frank Taylor and Company and a duet by Brother and Sister Stanford of Claresholm. Ruth Salmon

directed the congregational singing with Mrs. Emma Dahl at the organ. In both morning and afternoon sessions.

In the afternoon brief messages were given by Brother Smith of Cardston, President Urnsback, and Brother Quinton of Cardston. Musical selections included vocal solos by Sister Gibb of Magrath, Kathleen Holmes of Raymond and LaMonte Mattick of Cardston, with Lief Erickson of Stirling playing a violin solo. Brother Bennett was the principal speaker.

The evening session was conjoint Sacrament service for the four wards with Bishop Hicken of the Fourth Ward in charge. Brother Bennett was again the main speaker and a large congregation enjoyed his many in laudes and stories concerning the gathering of records.

Congregational singing was under the direction of LaVerne Anderson. A special musical number was a vocal solo by Evelyn Melchin.

Welling News Notes

Mrs. Augusta Bullock entertained sixteen children on Thursday in honor of her daughter Joan's seventh birthday. Besides gifts from her small guests, she was presented with a Barbara Ann Scott doll, complete with clothes and skates, by her parents. The children were given lunch on the beautiful lawn and then taken to Henderson Park by Mrs. Bullock and her sister Mrs. Elizabeth Taylor. Those present were Callie and Norman Wilde, Cookie Mehew, Judy Miaoouli, Gale Peterson, Shanna Nelson, Marden and Marilyn Wolsey, Carol Bullock, Wenheth and Gilbert Gibb, Arthur and Lois Bullock, Mary Kado and Eric De Haunt.

The Wilde families have as guests from Provo Utah Mr. and Mrs. Thomas Ashton, Mr. Charles Ashton and Mrs. Ida Erenbrack.

Geraldine Gray of Spokane is the guest of Mildred Wilde.

Congratulations to Mr. and Mrs. Ray Bullock on the birth of a baby boy born Monday, July 11.

Mr. and Mrs. Roy Peterson have returned from an extended trip thru the U.S.A. They were as far south as Mexico, returning by way of Utah.

Mr. and Mrs. A. F. Bullock and Mr. and Mrs. John Wolsey spent a few days in B. C. returning by way of Calgary and Banff.

Mr. E. K. Bullock has returned home after attending the Calgary Stampede and visiting his son Kim at Banff. Kim is employed there for the summer.

An enthusiastic group of boys left here Wednesday to attend the Scout Jamboree at Ottawa. These boys have been working toward this end for a year and are very glad they have succeeded. Those in the group were Arthur, Ross and David Wilde, Gerald Bullock, Kenneth Taylor, James Gibb, Grant Peterson, Mark and Dan Chipman, Arvil Foote, Garry Holland Allen Pack and Harold Chipman.

Mr. and Mrs. Gerald Gray of Spokane spent a few days here and at Coaldale and Raymond visiting relatives.

Among those attending the Calgary Stampede were Mr. and Mrs. George Bullock, Mr. and Mrs. N. B. Seward and Mr. Len Mehew and daughters. Miss Jean Mehew has returned home from Ottawa where she has been going to school for the past year.

Mr. and Mrs. Milton oWisey, Mr. and Mrs. Kenneth Wolsey and Mr. and Mrs. Don Wolsey, all of Edmonton, visited here with relatives and in the district for a few days.

THE FARMER

Man builds his castles, fair and high
Wherever river runneth by;
Great cities rise in every land,
Great churches show the builders hand

Great arches, monuments, and towers
Fair palaces and pleasing bowers;
Great work done, be it here or there
And well man worketh everywhere
But work or rest, whatever befall,
The farmer he must feed them all.

—Charles G. Leland.

AN ADDRESS TO HIS AGING BODY

by Edward Cameron.

Now you are growing old. Your hearing and strength are failing. Your resistance to cold is diminishing. You cannot climb or run as you once could. In a word you are running down. In a short time, perhaps a year or five or ten years—you will cease to breathe and your heart will stop beating.

When you can go no farther I shall leave you and be free. When we separate I shall continue to exist. A Power greater than you or I started us on our journey. Your journey is approaching its end and you are aware of it. My journey has scarcely begun and I know it because I have never been more alive. Our separation is not one of sadness but of joy. You are weary and want to stop. I am longing to alight from this slowing vehicle and go on without you.

EMPIRE SEA CADETS CAMP IN CANADA: Shown above are typical scenes at Camp Ewing, Que., the Royal Canadian Sea Cadets camp near Montreal where 80 selected Canadian Sea Cadets will play host to 78 cadets from the United Kingdom, Australia, New Zealand and Sweden between July 26 and Aug. 5. Top left: Signals Class; lower left: the Mess Hall seats 300 perpetually hungry Sea Cadets; top right: Recreation Hall; centre right: professional attention to small boats by the Nursing Sister; lower right: airy bunks make for sound sleep.

Office, Wardroom and Officers Quarters; lower left: Signals Class; lower centre: the Mess Hall seats 300 perpetually hungry Sea Cadets; top right: Recreation Hall; centre right: professional attention to small boats by the Nursing Sister; lower right: airy bunks make for sound sleep.

IT MAKES A DIFFERENCE!

"What's the best way to teach a girl to swim?"
"First you put your arm around her waist, take her right hand in yours—
"But this girl's my sister."
"Push her off the dock."

Moulting is a severe strain on the bird because of the amount of blood needed by the skin for the growth of new feathers.

BABY FOR SALE

Is this the news office, are you the man to see about writing an ad for the paper? I want one wrote for me. It won't take much advertising I haven't got much to tell. But we have got sir a baby, that we should be glad to sell. Doctor Blank brought him to our place and left him, but I do not think it quite fair, to bring a baby not finished, red hair on the top of his head, not a tooth in his mouth and his face all wrinkled and red. He cries all the night and my daddy has to walk the floor for hours. He says the path of a father won't grow very many wild flowers. My nana has given him my crib and I have to sleep in a bed, I want to sit on her lap sir, but baby was thoro instead.

I guess that's enough for advertising. But tell him who buys must keep. I won't take him back at no price. So we'll sell him now dirt cheap.

MY WEEK

Sometime ago I received from an American correspondent a booklet entitled: "Our Conservation Job". It dealt with the situation in the United States but was almost equally applicable to Canadian conditions.

I sent it out to a farmer friend of mine who is a competent critic, one who understands the problems of today, and is not indifferent to the days after tomorrow. This morning I have his answer. I pass it on to you I expect to review this booklet at an early date—here is the opinion of my farmer friend. Read it, read it carefully.

"The rate at which we are using up the natural resources of this continent is alarming, the increase in the rate is appalling.

"The world that Bonaparte got out to conquer differed but little from the world that Caesar had conquered, but the world that Hitler undertook to conquer was within sight of complete exhaustion of many of its most essential materials.

"It is only 15 generations since the white man came to America. What will this continent be like when another 15 generations have worked their will upon it? If we keep on as we are doing, it will be dead as the moon. The moon has no atmosphere, the earth will have none either if man keeps on discovering new ways of robbing tomorrow in order to increase today's enjoyment.

"Of all the millions of stars in the sky we have no evidence of even one to compare with the earth in beauty and life, and the possibilities of happiness, yet man, the creature who can get the greatest happiness out of it is destroying it at such a rate that it may soon be uninhabitable. What a creature.

"I agree with most of the suggestions in this booklet but the big task is to awaken the people to the facts of the situation and try to impel them to action. Is this possible in a democracy?

It is a relief sometimes to find a kindly word for the Member of Parliament. Theoretically, members of parliament could be better—there is no doubt about that. When we have better constituents we will have a higher type of member in the House of Commons.

The M.P. is not paid too much. \$6000 a year may seem a great deal to some people but the income tax takes a chunk out of it despite the

fact that \$2,000 is exempt as it should be. He has to live away from home for about six months of the year. The astonishing thing to me is that so many are willing to accept the job. It has its pleasures but it has its miseries. There are, of course, higher rewards but many things are in the way of a man who aspires to become a leader in political life, and much worry when it is achieved. I have a feeling of gratitude to the man who takes the risks and abandons business to enter into the field of politics.

That very competent lady Mrs. Katherine Marston, editor and proprietor of the Elora Express gives the correct point of view:

"It wouldn't hurt she writes, 'if we were to show a morsel of gratitude to the men who understand and who have undertaken to attend to the country's business. They spend, as a rule, strength, time and money for a very poor eventual reward. Even fame fades quickly and a few attain a very great degree of that rare commodity. All these things should be remembered as the campaign gets under way and maybe a little Christian charity on the part of the Canadian electorate would have surprising results. At any rate it wouldn't hurt to try."

CORRECT TRAINING OF CHILDREN NECESSARY FOR BETTER CITIZENS

Balanced living begins with the child. Basic character training in the home and the opportunity to practice democratic principles in the school—these are the means by which the child is developed into a worthwhile adult. Miss Christine McIntyre, Instructress in Social and Family Relationships at the Olds School of Agriculture points out that the whole child goes to school today. In the past, mental growth was stressed—mastery of the three R's but recruiting during the first world war showed that too many of our young men were physically unfit. As a result, courses of physical training and health studies were added to the school program.

World War 2 brought further enlightenment. Here it was found necessary to reject eight out of every hundred applicants for military service because of unsatisfactory mental health. They either lacked self ad-

justment or were ill adjusted socially. Self adjustment is the power to deal with one's inner needs and wants. Social adjustment is the ability to live and work constructively with others. Education is more than the mastery of subject matter and skills. It is the process of learning to live successfully.

Many employers in business and industry now look first for ability to work well with others. Unless the position calls for considerable technical knowledge and skill they consider these qualities much more important than the grade of education of the employee. Studies show that only 10% of young people losing jobs or failing to win promotion do so through lack of skills. The great majority fail because of personal defects. This by no means implies that education is not a valuable factor in life, but does indicate that knowledge without personality can never equip one to live as fully as he should.

There are so many ways in which we can improve our personalities, says Miss McIntyre,—just one of them is a matter of friendliness. If we would go just a little more than half way to meet the other person we would live in a happier world.

NEW MANAGER FOR MAGRATH WOOLEN MILL

Taken over by the Provincial Government over a year ago and operating since last spring, the former Golden Fleece Woollen Mill at Magrath has been reorganized and renamed the Prairie Woollen Mills, with George A. Clash as managing director. It was announced Thursday by J. E. Oberholzer, deputy minister of Industries and Labor.

Mr. Clash, who is Chairman of the Provincial Marketing Board at Edmonton will continue to discharge that duty.

KEEP GROUND MOIST AROUND LIGHTNING ROD

The Fire Commissioner recommends that owing to extended dry weather it is important that each ground connection to the earth from the lightning rod system be watered. The me-

thod recommended is to remove the earth to a depth of one foot beside each ground connection and to pour a pan of water around the rod. If this precaution is taken once a week during dry weather, the earth resistance to electricity will be reduced ensuring proper operation of the lightning rod system.

CAREFUL SELECTION NECESSARY WHEN FREEZING FRESH FOODS

Freezing preserves the flavor and natural characteristics of a large number of foods, says A. W. Moyle, Fruit and Vegetable Products Laboratory, Dominion Experimental Station, Summerland, B. C. Strawberries, raspberries, peaches, pears, corn, broccoli, spinach and asparagus are examples of fruits and vegetables that freeze very successfully. On the other hand, freezing of celery, lettuce, cucumbers, radishes, pears and watermelons has, so far, been unsatisfactory. It should be pointed out, too, that certain varieties of the same fruit or vegetable are more adaptable to freezing than others. In addition the quality in the frozen product depends not only upon the type and quality of the raw material but also upon the method of freezing—pre-treatment, packing, type of storage and care in handling until it reaches the consumer's table.

Spoilage changes in thawed frozen foods are similar to those taking place in the fresh product, but proceed at a very much faster rate. Many consumers do not appreciate this fact, believing that frozen products like canned foods, will keep indefinitely in the unopened container. This is not so. Frozen foods are not sterile. They should be used preferably before thawing is complete.

Food in the frozen state is subject to dehydration unless covered with a film of ice or oil, or packaged in tin or other moisture vapour-proof containers. Changes caused by the presence of oxygen may also occur. The effect of this oxidative process may be lessened by the use of airtight packages. In some instances the addition of sugar or an antioxidant such as ascorbic acid, to fruit packs, has decidedly beneficial effects on colour and flavour. To retain desirable colour, flavour and texture in vegetables, it is essential that they be properly blanched (scalded)

EXPERIMENTAL FARM

WEEKLY LETTER

HAM AND POTATO SALAD

There aren't many people who dislike picnics. The open air, the smell of growing things, the thought of slightly different food in greatly different surroundings, with no dishes to wash, all serve to whet the appetite and add more zest to the usual pleasure of eating.

The Experimental Station is a very popular place for picnics. Last summer we averaged about two per week. However the picnic of all picnics, the annual field day, occurs this year on Wednesday, July 27. This is the day when people from all over Southern Alberta congregate at the Station to meet their friends, to view and hear about the work in progress and to spread their cloths on the picnic tables of the spacious lawns and enjoy Mother's picnic specialties along with coffee, milk and cream provided by the station.

In boiling water or steam before cooling, packaging and freezing. This preliminary treatment is necessary to prevent undesirable changes which may otherwise take place in the frozen vegetables.

Some foods may be stored longer than others but there should be no carryover from season to season. To retain maximum quality in the frozen product for a twelve-month period of storage, it is essential that the product be stored at 0 degrees F. or lower. At this temperature, provided that they have been properly prepared and packaged, foods in the frozen state are not subject to serious chemical, physical or microbiological changes. Storage temperature higher than 0 degrees F. especially if they are fluctuating are detrimental to quality, and under such conditions undesirable changes will occur in foods relatively quickly.

In comparison with unrefrigerated fruits and vegetables quickfreezing conserves the vitamins. It also provides a more interesting and varied diet. This method of food preservation has made great strides in the past few years, and as the years go by will become of even greater value to the busy housewife.

This year a special invitation is being made to all townspeople to come and bring their families and enjoy the day with their farm friends. Special emphasis will be given to home beautification—lawns, shrubs, hedges and flowers; there will be sports and movies for the kiddies and opportunity will be provided for all to see and discuss the various phases of agricultural research now being conducted.

One farmer said that he got an idea at the Experimental Station Field Day last year that saved him a thousand dollars. We sincerely hope that this year there will be a thousand dollar idea for everyone who attends. Then, too, our technical staff pick up a lot of thousand dollar ideas from farmers as well as some million dollar problems. At the present time we have a generous supply of problems but we always have room for ideas on how to solve them. The Field Day provides the ideal situation for an exchange of ideas, exchange of scenery and a variation in diet. DAD—don't forget to set aside Wednesday, July 27 for the family picnic, and mother—don't forget to set aside plenty of ham and potato salad

Low Fares

From all stations in Saskatchewan Alberta and Manitoba.

To SASKATOON EXHIBITION

JULY 23 TO 29

Skinny men, women gain 5, 10, 15 lbs.

Get New Pep, Vim, Vigor

What a thrill! Bony limbs fill out; ugly hollows fill up; neck no longer scrawny; body loses lank, sickly "lean-pole" look. Thousands of girls, women, men, who never could gain before, are now proud of shapely, healthy-looking bodies. They thank the special vitamin-building, tonic, Oxtrex, its tonic, stimulates, invigorates, from vitamin B₁₂, calcium, enriches blood, improves appetite and digestion so food gives you more strength and nourishment; put flesh on bare bones, stop getting too fat. Stop when you've gained the 5, 10, 15 or 20 lbs. you need for normal weight. Code little. New "test acquired" was only five. Try famous Oxtrex Tonic Tablets for new vigor and added pounds, this very day. At all druggists.

SO COOLING!

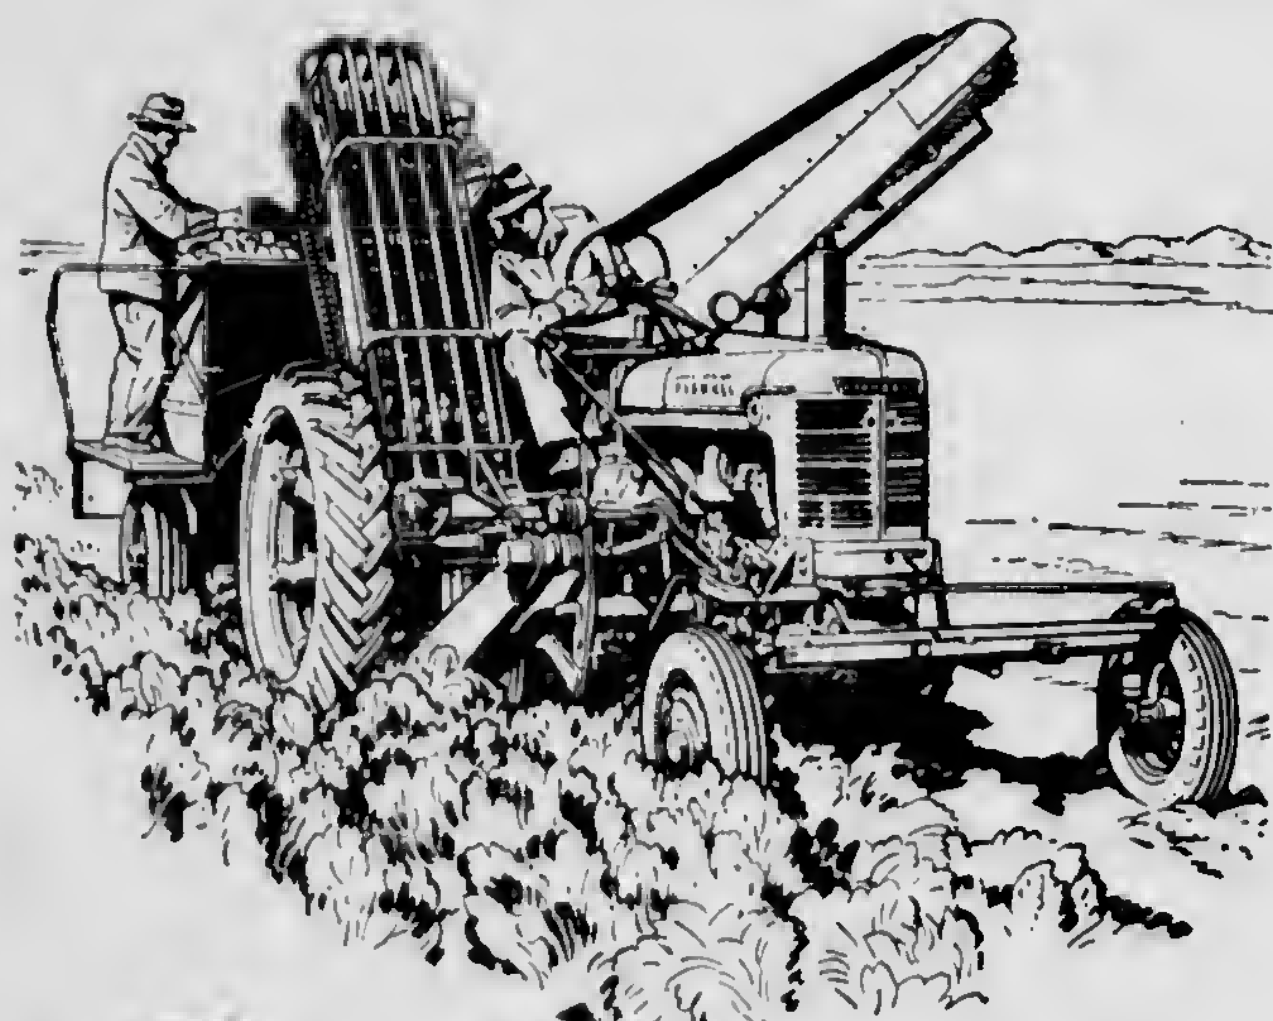

Enjoy A FRESH WATER SEA VOYAGE ON THE GREAT LAKES

Glorious days sailing through Georgian Bay, Lake Huron, St. Mary's River, Lake Superior. Airy state-rooms, tasty meals, deck sports.

TAKE A 2-DAY VOYAGE TO OR FROM THE WEST

To break your rail trip. No extra cost for transportation on first class rail tickets. Full information from

Once Over and IT'S ALL OVER

with a McCormick-Deering Beet Harvester

Here's a real time and labor saver... the McCormick-Deering HM-1 Beet Harvester for Farmall H, M and MD Tractors.

In one continuous operation, this machine tops, lifts, cleans and loads the beets into a special two-wheel cart to complete the harvest in a "once over and it's all over" operation.

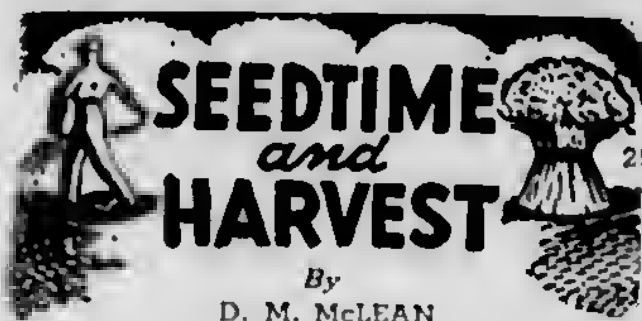

With the HM-1, you can harvest 5 to 6 tons of beets in an hour. You don't have to worry about weather or field conditions because this machine does a good job when it's not easy to harvest beets by other methods.

Ask us for details about this labor-saving, time-saving machine.

Raymond Mercantile COMPANY LIMITED

"Where You Get More of the Best for Less"

By D. M. McLEAN Assistant Director, Line Elevators Farm Service, WINNIPEG, Manitoba.

Variety Plots and Field Days

Farmers and others are always interested in variety test plots and in new and unusual crops that they have never seen before. Because of this interest country grain buyers and Contractors associated with the Line Elevators Farm Service have arranged for over 1,800 of these plots and community service during the past few years.

Purpose. These plots provide an excellent means for farmers, grain buyers, Junior Club members and others to become acquainted with the performance of varieties, old and new, under local soil and climatic conditions. Furthermore, there have been many changes in the officially recommended varieties in recent years. Most of those grown on farms today were unknown 10 years ago. Fortunately, the changes have been all been improvements and these plots provide one means of keeping up-to-date.

Research Pays Dividends. Crop production in Canada owes much to the plant breeder. Certainly the great cereal crops we produce in this country have originated almost entirely from varieties developed and improved by Canadian plant breeders. Farmers can look to the future with confidence, since the science of plant breeding will continue to provide the solution to many of our most important crop production problems.

Field Days. A common summer feature of agricultural extension work is the "Field Day" where new farm practices, new crop varieties and the results of field experiments are seen by and explained to farmers. Successful farmers know that any time spent at an Experimental Farm, Illustration Station or Variety Plot is well worth the effort. The greatest benefit is derived from variety plots when a field day is organized with a crop specialist present to discuss the merits and failings of the different varieties.

Everyone interested in field crops, new varieties, and good farming is cordially invited to visit Line Elevator field plots. The Line Elevator Agent in charge will welcome your interest in his plots, so plan now to attend the "Field Day". Watch for local posters giving the date and time.

ANNUAL FIELD DAY

Experimental Station, Lethbridge

Wed., July 27

Come anytime between 10 a.m. and 2 p.m.

There are two objectives in citizen development. Adolescent students should be helped to stop acting like adolescents as soon as possible. They should be given an understanding of the requirements of adult behaviour. They should also be taught to realize that one can be an adult in years and in physical and mental development, and still behave as an immature person both emotionally and socially. Failure on the job on approximately 90 percent of the cases means immaturity—undesirable personality traits carried over from childhood. Broken or disorganized homes usually develop from emotionally or socially immature individuals. Adult responsibility in this growing up process might be stated briefly as follows says Miss McIntyre: That adult should set a good example by being himself emotionally and socially mature. He will give wise guidance by introducing young people to life gradually, and not try to protect them from it. He will stimulate growth in independence, and as fast as the young people show ability to assume responsibility he will let them take over.

TRACTORS CAUSE OF MANY ACCIDENTS

Tractors account for 28% of farm machinery accidents in the United States according to official figures and most often it is while cranking the tractor that farmers get sprained wrists or arms. Next frequently reported are accidents that happen while attaching other implements to tractors, being struck or run over by tractors that tip over or rear, and jumping or falling off tractors.

Combines and threshing machines account for about a third as many accidents as tractors and corn pickers and corn shellers account for six per cent of machine accidents. Home machinery used chiefly by women accounts for only three per cent of all machinery accidents.

Though these figures apply to farms in the United States there is no reason to assume that machinery accidents are less frequent in Canada. More careful handling of farm and home machinery will prevent many aches and pains, or accidents of a more serious nature.

Gas Export Policy

The special session of the Alberta legislature held last week, decided upon a "policy" for the exportation of natural gas from this province. A bill was passed giving sweeping power to the Conservation Board over such powers will be exercised under the province's oil and gas resources, the direction of the cabinet.

The administration of Alberta's oil and gas resources is a heavy responsibility. The objective is to use these resources for the best interest of the province.

The Dinning report showed known reserves of natural gas to be 4.26 trillion cubic feet. Present consumption is 50 billion cubic feet a year, so that there is now sufficient gas in sight for fifty years of Alberta's current requirements.

But if there is an increase in gas consumption in Alberta of 3.5 billion cubic feet a year, and if exports are permitted to go to Manitoba, Saskatchewan and British Columbia, reserves should be at a figure of 13 trillion cubic feet.

The Dinning Report recommends that exports should not be permitted to disturb the structure of gas prices within Alberta. The report also comments that Alberta is a stronger bargaining position in the matter of gas export and this strength should be used judiciously and for the welfare of the people of this province.

The Manning government, up to the present, has shown considerable astu-

Our emotions are the driving powers of our lives. When we are aroused emotionally, unless we do something great and good, we are in danger of letting our emotions become perverted. William James used to tell the story of a Russian woman who sat weeping at the tragic fate of the hero in the opera while her coachman froze to death outside.—Earl Riney.

GROWING UP

The attitudes of parents towards each other have a tremendous influence on the behaviors and attitudes of the children, says Miss Christine McIntyre, Instructress in Social and Family relationships at the Olds School of Agriculture. The best parent is the one who is himself a well adjusted individual.

Length of adolescence—of the growing up period—has changed considerably in recent years. Early Canadian children left home at an average age of 16 years, and often before to launch out on careers of their own. Modern young people depend on parents until they are 18 to 20 and occasionally even 22 years of age. Miss McIntyre suggests that parents should endeavor to provide ways and means of aiding young people to become more independent, to become producers as well as consumers in the home. Even at an early age, children can start by helping with various tasks within their ability.
